

New Offerings from FatPipe

11 August 2005

The creator and holder of four patents in router clustering technology FatPipe, Inc. has introduced new products. Mr. Jesse Carrillo, International Sales Manager, launched the products.

FatPipe products provide high levels of redundancy, reliability, speed as well as dynamic load balancing and additional security of data transmission over a shared data network. FatPipe provides seamless transmission. Even if one line fails, the user would have uninterrupted transmission through other lines.

Specializing in intra-corporate communication over the WAN, FatPipe claims no product competition, holding four patents and over 100 claims. Regarding the FatPipe products, it is the hardware that sits on the PC platform at the customer's side and we do all the route management.

FatPipe has impressive clientele - ranging from Fortune 500 companies to small consumers. FatPipe customers include companies in the tech industry, law firms, hotels and the health sector. Headquartered in Chennai, Fatpipe Networks India Pvt. Ltd. is looking forward to expanding through a network of distributors, resellers and dealers.
