

FatPipe Technology Addresses Broadband Connectivity Issues Caused by a U.K. Internet Outage

SALT LAKE CITY, UT– Sep 5, 2012

Customers of UK Internet providers, including Sky Broadband, Telefonica (owns O2 and Be), Virgin Media, BT, and others were recently faced with challenging Internet routing issues. As a result, broadband customers faced serious connectivity issues.

Such unpredictable events -- without the ability to forecast when services will be up again -- can fundamentally interfere with Internet-based business transactions and business continuity. FatPipe Networks™, the inventor and multiple patents holder of Wide Area Network (WAN) redundancy, security, and optimization products, specializes in providing solutions that transcend Internet and other WAN failures to maintain business continuity.

FatPipe products aggregate multiple data lines of any speed and combination (DSL, Cable, E1, DS3, 3/4G, satellite, MPLS, etc.) from multiple ISPs to achieve the highest level of Internet/WAN resiliency and redundancy. FatPipe automatically, intelligently and seamlessly fails over lines and sessions when ISPs, physical lines or components unexpectedly fail, without BGP. FatPipe also increases bandwidth for end users by aggregating multiple lines of similar or disparate speeds, as well as higher levels of security with its patented SmartDNS

and MPsec technologies.

About FatPipe Networks

FatPipe Networks, based in Salt Lake City, Utah, USA is the inventor and holder of 8 patents with over 168 specific technology claims for products that provide the world's highest redundancy, reliability and security for WAN/Internet transmissions. Customer benefits include up to seven-nines WAN redundancy, reliability, and speed; dynamic load balancing, WAN optimization, and additional security, including UTM services, and IPsec capabilities.

FatPipe has received 40 awards for innovation and leadership, including being listed on the Deloitte Technology Fast 500 as one of the fastest growing companies in North America, and three years in a row on the Inc 5000, as well as the Inc 500 as one of the fastest growing private companies in the US. FatPipe's India office was listed as the number 1 fastest growing company in India in the 2010 Deloitte India Fast 50, listed 14 on the 2010 Deloitte Asia 500.
