CRN NEWS, ANALYSIS AND PERSPECTIVE FOR SOLUTION PROVIDERS AND TECHNOLOGY INTEGRATORS

# 6 Hot SD-WAN Technologies To Follow In 2019

The SD-WAN market is crammed with solutions from both emerging startups to established networking vendors. But here are six SD-WAN technologies that solution providers should keep an eye on this year.

Fat Pipe Symphony

Fat Pipe Networks considers itself "the best-kept secret" in the SD-WAN space. The Salt Lake City-based company has been offering SD-WAN for the past 20 years, according to Fat Pipe.

The company's SD-WAN portfolio, Fat Pipe Symphony, can be used by enterprises to control and manage their WANs. The company offers SD-WAN Basic, SD-WAN Advanced, and SD-WAN Pro, depending on the features needed at each branch. Fat Pipe's SD-WAN offerings can be hosted in the cloud, including AWS and Azure environments. The company also has integrations with its SD-WAN product with Avaya and Nutanix. Fat Pipe does upwards of 90 percent of its business through the channel.
